Platform stairlifts for all possible staircases

Platform stairlifts are the most practical form of transportation on a stairway. They can transport wheelchairs or people sitting on the folding chair. It also allows to carry goods such as groceries along with the user on the platform.

Our platform stairlifts are the most versatile on the market. They allow installation on very narrow staircases, with tight turns, with very steep and long rail runs and in fierce outdoor weather conditions.
3 different lift model provide solutions for any problem

All platform stairlift models have the same platform mechanics and platform design. The main difference is in the drive system, which allows to choose the best option for different requirements.

**Omega - the specialist**

- The slimmest platform stairlift on the market for straight and curved staircases
- Rope traction drive systems for installations on very narrow or very steep staircases
- Lift runs of main power - no batteries are necessary. This allows for: very long travels, use in very cold climate and high frequency use in public places.

**Stratos - curving elegance**

- Rack and pinion drive system with battery driven motor for installation on curved staircases
- Fast and easy to install with very low maintenance need
- Right choice for standard staircases in public and private as well as indoor or outdoor environments

**Delta - straight performer**

- Rack and pinion drive system with battery driven motor for installation on straight staircases only
- Extremely slim and aesthetic design with rails from adjustable aluminium profiles or stainless steel
- Installations on very narrow indoor and outdoor staircases
We provide access!

Robust platform mechanics allow installation in **cold or wet locations**

Available in a **stainless steel version**, the platform fulfils highest architectural standards.

Turing **around one central pillar** leaves maximum clearance on the staircase.
The **drive without batteries** allows for very long rail lengths

**Rail fixing directly to the wall** allows for a maximum platform size

Available in **any RAL colour**, the platform can blend elegantly into any surrounding
An easy to use and reliable lift that makes life easier.

A strong and stable platform allows easy and safe access at the landings.

Compact folded platform with metal covers is well secured against vandalism in public spaces.
An elegant and modern lift that fits smoothly into any environment

**Colorful**
Available in any RAL colour, the platform can blend elegantly into any surrounding or bring some colour into grey spaces.

**Quality and Safety**
TÜV approved! Made according to the European norm EN 81-40.

**Reliability**
Rigid platform mechanics and a strong motor with low consumption allow for a long lifespan of the product.

The special drive systems allow the platform to make inside and outside curves with a small curve radius.

Special platform sizes and asymmetrical shapes to custom fit any staircase and maximize user friendliness!

Very slim platform – The folded platform allows to comfortably store away the platform.

www.lehner-liftechnik.at
Main advantages of our platform stairlifts

- Slim and aesthetic design
- Installations on very narrow and steep staircases
- Custom made platform sizes and shapes are possible
- Available in all RAL colours or as a stainless steel version
- Diagnostic display for status and error indication on the platform
- Platform frame and mechanics are built from solid steel parts making the platforms robust and secure against vandalism
- Manufactured according to the European standard EN 81-40 and certified through TÜV!

- Available in any RAL colour
- Variable speed
- Folding seat with automatic fold-up
- Automatic platform folding
- Stainless steel version
- 90° access ramp
- Joystick control on platform
- Outdoor version
- Platform sizes up to 1000mm in width and 1400mm in length
The chair stairlift for curved staircases

The Alpha stairlift can eliminate the barrier of stairs by providing safe and easy access to another floor. The Alpha is designed to be installed on stairs with a curve, an intermediate landing, or when out-of-the-way parking is desired. Smooth riding, comfortable and reliable, the Alpha stairlift features a double rail system for strength and durability.

The lift is easy to operate with controls on the armrest as well as two radio frequency remote controls. The rails are custom bent to your exact specifications, based on computer-aided design software and photo measuring. This is all done with industry leading lead times. Choose from different seat and rail colours to suit your taste and make the lift fit perfectly into your home.

Elegantly and safely up the stairs with the Alpha curved chair stairlift
Main advantages of the Alpha stairlift

- Silent, stable and smooth ride quality
- Choice of colours for finish of rail and seat upholstery
- Tight internal and external curve radius
- Retractable seat belt
- Long range radio frequency landing controls
- Start delay to prevent sudden movement
- Safety sensors and overspeed governor
- Soft start and smooth stop
- Stable and slim twin rail system

The elegant design makes this stairlift a piece of furniture

The swivel mechanism allows a safe exit at the upper level
Top overrun with parking curve for **comfortable access**

**Compact design** saves space when the chair is folded up

**Tight turning radius** for space saving

180° parking

The chair stairlift for straight staircases

The Essential stairlift is one of the easiest ways to stay in your home and enjoy the freedom of barrier-free living. Installed on your stairs, in only a few hours, the stairlift carries you smoothly and quietly up a straight flight of stairs.

The Essential stairlift is uniquely compact – with the slimmest fold-up dimension on the market at only 270 mm wide – to allow easy access to the stairs when the lift is not in use.

With safety features including a retractable seatbelt, overspeed governor and obstacle sensor system, you can count on your stairlift. Finished in soft white with an unobtrusive design, the Essential blends easily into your home décor.
Constant charge make the lift available at all times

Rack and pinion drive ensures stable and safe drive up the stairs

Ultra slim folded with of only 270mm leaves maximum clearance on narrow staircases

Main advantages of the Essential

— Ultra slim folded size of only 270mm – the smallest profile on the market to keep the unit out of the way when no in use
— Quiet and smooth-riding operation from the rack and pinion drive system and retractable seat belt
— Battery operated with built-in charging so the chair can be used several times even through a power failure
— LED status lights to advise you of any issues
— Unit can be installed on either side of the stairs (reverseable)
— Comfortable and durable seat with width-adjustable arms up to 51 cm wide and 140kg loading capacity

Convenient joystick control allows for an easy use

LIFTBOY 1 & 2

The low rise vertical platform lift for lifting heights up to 830mm

Where ramps are too steep or too long – where stairlifts or elevators are needless due to too small a difference in altitude – the Liftboy is the optimal solution. With the help of our Liftboy models 1 and 2, wheelchair users and physically disabled persons can get over differences in altitude of up to 83 cm.

The Liftboy is designed for indoor and outdoor use! As the weatherproof lifting platform with a total weight of only 70 kg can easily be put up, it offers a perfect solution also for urgent or temporary needs. The lift can be equipped with special side entry or exit, upper access gate or transport wheels.

Permant installation also for outdoor locations

Public access lift with upper gate and control pillar

Optional gravity access ramp folding, 90° exit and special colour
LIFTBOY 5

The vertical platform lift for lifting heights up to 1300mm

The Liftboy 5 lift is built to carry a wheelchair and passenger safely up and down levels with up to 1300mm difference in height. The lift has a modern design with glass inserts in the sidewalls and upper gate. As an option to the automatic folding ramp the Liftboy 5 can also be equipped with a platform gate.

Suitable for installations in public and commercial buildings, as well as private homes, this lift suits virtually any project requirements and aesthetic needs and is ready to serve with its reliable performance, ease of use and range of finish options.

The Elevex is a vertical platform lift designed for low-rise travel indoors or outdoors. With its durable design, the Elevex is popular for accessing decks and porches even in demanding climates.

At the heart of the Elevex is the reliable operation of the ACME screw drive which delivers precision movement and performance you can count on day after day. Handling up to 340kg this lift can carry a passenger in a wheelchair with ease. An array of safety features ensures safe operation including sensors to stop the lift if it senses an obstruction. The Elevex is an easy and economic way to add access for low-rise travel.
Optional side exit at upper level

Upper level gate with optional glass inserts

Upper door integrated in handrail

**Main options of the Elevex**

- Upper landing gate
- 2 different lifting heights
- Side exit on upper level
- Handrail on platform
The "Alpin Z300" vertical platform lift is an economic and efficient alternative to elevators. It is designed for convenient use by the elderly or handicapped, occupying minimum space for a simple retrofitting without structural modification or additional building work.

The model without shaft structure and with open cabin represents a minimal visual obstruction and can be well integrated into the architectural background.

A robust double chain drive system ensures a reliable performance of the lift, even in cold winter conditions and reduces the need for maintenance to a minimum.
Main advantages of the Alpin platformlift

- Up to 4m lifting height
- Smooth and stable drive
- Drive tower to be mounted in 1 piece for a fast and simple installation
- Reliable and safe double-chain drive
- Special platform sizes are possible
- Option with glas shaft
- Entry-exit on same side or at 90°
- Available in any RAL colour
- Available in stainless steel
We provide access!

Free-standing
The free-standing drive tower permits a fast installation with minimum constructive works required on site.

Quality and safety
TÜV certified! Fulfills the highest safety standards and is built according to the valid European norm EN 81-41.

Reliable
Especially designed for outside installation, the double-chain drive and the robust electrics provide for a safe drive and a low maintenance operation.

Lift with 70mm pit and execution in stainless steel

Glas shaft with steel or aluminium frame as an option

Glas shaft with roof and special colour

- Entry-exit on same side or at 90°
The poollift Dolphin is a valuable aid to get you in or out of a swimming pool without the need for any assisting person. No underwater installation is necessary. The lift is only fixed 1 time at on the upper level. Without the need for any electrical installation or battery use, the poollift runs on 3,8 bar household water pressure only!

Operating levers at the upper as well as at the lower level allow a simple operation of the unit. The height adjustable seat turns automatically 90° when lowering or rising. This poollift is very easy to install (and also to demount for storage matters) and is made from high grade (316S) stainless steel!
Main options of the Poollift

- Seat colour choice
- Transport wheels
- Extra long vertical travel

Main advantages of the poollift Dolphin

- Independent use - no assistance required
- Hydraulically powered with 3,8 bar household water pressure
- No electrical components
- Appealing design in grade 316 stainless steel
- Very easy and fast installation
- No underwater fixation necessary
- Applicable indoors and outdoors
- Safe and reliable use

Independent use without the need for an assisting person

Perfectly suitable for public swimming pools
A stairclimber offers a cost effective solution to an elevator or a platform stairlift. Easy to handle and transport, these robust machines can serve as a quick solution for many mobility problems. If not needed anymore the stairclimbers can easily be sold again to another user.

We offer the following unique stairclimbers:

- **Stairmax** – only stairclimber worldwide for independent use
- **Public** – only stairclimber worldwide for electrical wheelchairs
- **SA-3 and SA-S** – standard stairclimbers for different purposes and space requirements
- **Evac-Skate** - evacuation chair

Special stairclimber SA-3 carries all types of manual wheelchairs
Stairmax

The only stairclimber worldwide that allows to use your own wheelchair without the need for an assisting person!

This mobile wheelchair stairlift can turn on intermediate landings having a minimum width of 1 m. It is a robust and compact device that can be transported easily between different staircase locations. The users wheelchair needs a small adaptation to the frame of the wheelchair. This adaptation is normally done at the premises of Lehner Liftechnik GmbH.

The user can easily rotate the Stairmax even on narrow intermediate landings. After the Stairmax is put into the right position the user brings the Stairmax into the inclined position by using the handrail. See the demonstration video on our website for more detailed information!

Public

The only stairclimber worldwide that allows to transport all types of wheelchairs, including electrical wheelchairs

The stairclimber Public is the world’s only portable inclined platform lift. The unique platform design will accommodate all types of wheelchairs including power, child sports and conventional adult wheelchairs.

The Public stairclimber is ideal for public and residential buildings and a cost effective alternative to conventional platform stairlifts. It’s simple to operate, robust and incorporates many safety features. It can be used on indoor and outdoor stairs and can also be transported between location to be used on different staircases.

Wide double tracks are steel-reinforced and securely grip all types of stair designs and materials

An integrated loading ramp with non-skid surface makes wheelchair boarding easy

A powerful hydraulic piston adjusts the wheelchair platform position for travel on the stairs
**SA-3**

The robust and versatile standard stairclimber

The stairclimber SA-3 features an increased loading capacity of 160kg. A flexible adjustment system allows the installation of extra wide wheelchairs or wheelchairs with a special frame design. With this stairclimber any type of manual wheelchair can be transported. The product is very robust and requires a minimum of maintenance.

The stable construction and the self locking gearbox ensures that the stairclimber stays save in place even if the assisting person releases the grab bars on the stairclimbers. The strong battery and low consumption motor allow for a long use between charging cycles and make multiple runs on long stair flights possible.

**A stable and self-supporting** construction allows save operation on different types of staircases

**Various safety features** ensure a safe attaching of the wheelchair to the stairclimber

**Special optional attachement**

In combination with shoe attachment and multifunction clamp it is suitable for wheelchairs with folding detachable backrest, adjustable handle, hand brake lever or small wheelchairs 12 -22 inch. Allows the transport of any manual and some electric wheelchairs.

**A powerful motor** allows any attendant to safely transport a larger person up and down stairways
The stairclimber can easily be disassembled into 2 parts. This makes it easy for one person to store the unit or transport it in the trunk of a car between different locations of use.

SPECIALS

PL 1400  Train acces lift

The vertical lifting platform PL1400 is specifically designed for the lifting/lowering of wheelchair drivers to/from train carriages. It is a modern and technically advanced product with easy operation thanks to its design and light construction.

The platform is equipped with width adjustable foldable ramps, which size can be adjusted to the width of the particular train carriage doors. A brake system fixes the 4 wheels in place when lifting a passenger or when parked away.

IKAROS  Airplane access lift

The Ikaros platform stairlift is the only product in the market for height adjustable air-stairs. The platform automatically adjusts its platform level when the lifting height of the air-stair is changed.

This lift can transport wheelchair drivers in their own wheelchair directly to the plane doors in a safe and comfortable manner. The Ikaros can be supplied fully assembled together with the air stairs or it can also be adapted to airstairs that are already used at the airport.

Omega C  Inclined cabin lift

Based on the Omega drive system this special product can be delivered with full or half sized cabin. This solution is favoured by private home owners living on a hillside. The protection from the weather allows for the convenient transport from the car parking area to the entrance of the estate.

Through the direct power supply and the special Omega drive system this lift allows for non-stop travels, even in heavy winter condition. Rail length of up to 80m have been realized!
Providing access around the world!

Over 20,000 lift installations have been realized over the past 30 years which provide accessibility solutions to all kinds of public and private needs around the world!
